Press release

Avantium Receives Triple ISO Certification

AMSTERDAM, 20 January 2026, 07:00 hrs CET – Avantium N.V., a leader in renewable and circular polymer materials, proudly announces that it has successfully achieved certification for ISO 14001 (Environmental Management), ISO 45001 (Occupational Health & Safety Management) and ISO 9001 (Quality Management) for the production of intermediate chemicals used in the production of FDCA (furandicarboxylic acid) at its FDCA Flagship Plant in Delfzijl. The comprehensive audit was carried out by DNV, confirming that Avantium's environmental, safety and quality management systems meet globally recognised standards

---

Achieving all three ISO certifications demonstrates Avantium's strong commitment to operating responsibly: reducing environmental impact (ISO 14001), ensuring a safe and healthy working environment (ISO 45001), and delivering consistent, high-quality performance across our operations (ISO 9001). This achievement reflects the dedication of our teams and supports our ambition to scale our sustainable technology for the production of FDCA with the highest standards of operational discipline.

"Receiving these certifications is a testament to the hard work of our people and the values that guide Avantium," said Nanda Weitering, Quality Manager at Avantium. "Safety and sustainability are at the heart of how we operate every day, and these standards strengthen the foundation on which we are helping to build a fossil-free chemical industry."

About Avantium

Avantium is a pioneering commercial-stage company focused on renewable & circular polymer materials. Avantium develops and commercializes innovative technologies for the production of materials based on sustainable carbon feedstocks, i.e. carbon from biomass or carbon from the air (CO_2). The most advanced technology is the YXY® Technology that catalytically converts plant-based sugars into FDCA (furandicarboxylic acid), the key building block for the sustainable plastic PEF (polyethylene furanoate). PEF is known under the brand name releaf®, an EU registered trademark of Avantium. Avantium has successfully demonstrated the YXY® Technology at its pilot plant in Geleen, the Netherlands, and is in the process of starting the world's first commercial plant for FDCA in Delfzijl, the Netherlands. Avantium works in partnership with like-minded companies around the globe to develop revolutionary renewable chemistry solutions from invention to commercial scale.

Avantium's shares are listed on Euronext Amsterdam and Euronext Brussels (symbol: AVTX). Avantium is incorporated in the Euronext Amsterdam SmallCap Index (AScX). Its offices and headquarters are in Amsterdam, the Netherlands.
